

Grove Park Primary School National Coding Week – September 2020

National Coding Week was founded in 2014. It aims to help build people's confidence and skills by encouraging fun and engaging digital events. At Grove Park, as part of our vision for Computing, the children took part in a variety of coding activities across the school during the week of 14th September.

Grove Park's Vision for Computing: Grove Parkers are computational thinkers who are digitally literate and safe on the internet.
